By Mista Cleo

Capricorn

(Dec. 22- Jan. 19)

Mista Cleo says to eat Chinese food this month and you'll find a fortune in your cookie.

Aquarius

(Jan. 20- Feb. 19)

This month the moon is in the second power, and Jupiter is aligned with Mars, peace will rule the planet, and love will steer the stars. This is the dawning of the age of Aquarius, the age of Aquarius (really carry the US in that last Aquarius, and hold the last one), Aquarius. Liberty and understanding... . No? Okay, I heard that somewhere once.

Pisces

(Feb. 20- March 20)

The cosmic order of things will have you deep in thought about your place in this world. In order to gain knowledge and understanding, send a check or money order to Mista Cleo. For a small donation of \$200, Mista Cleo will explain the universe to your child-like mind.

Aries

(March 21- April 19)

Na na na na na na, they say it's your birthday. Yeah, well, big deal. What do you expect, all your friends to drop everything just because it's your birthday. Well, okay, but just this once.

Taurus

(April 20- May 20)

Life will speed up this month and throw you some unexpected

curves. Let us just hope you're not driving a busted ass Ford *Taurus* and you can handle yourself behind the wheel.

Gemini

(May 21- June 20)

This month, life will be like a box of chocolates... . It sounds nice, but you'll never choose the piece you really want and you'll end up disappointed with a box of nasty half-eaten chocolate.

Cancer

(June 21- July 22)

Take time out this month to stop and smell the roses. But since it's still winter, there are no roses to be found. Find something else to smell; stop, and smell it. In actuality, if your life is busy, this could be considered a waste time and completely ruin your month.

Leo

(July 23- Aug. 22)

Go base jump off a bridge or cliff and hopes someone

sees you do it. Who knows, you might get your own action figure- it worked for Shane McConkey. Just remember pain is temporary, action figures are forever.

Virgo

(Aug. 23- Sept. 22)

It is perfectly clear to Mista Cleo that you are on the wrong path in life. The answer is simple- Follow the yellow brick road.

Libra

(Sept. 23- Oct. 23)

Since your sign rhymes with Zebra, it means you have a lot of stripes, or layers to your personality. Remember that if one of your layers is acting like a complete ass, Mista Cleo says you can always try another layer.

Scorpio

(Oct. 24- Nov. 22)

Sick of being single this month? Mista Cleo has all of the answers. Don't know what you're doing wrong? I do, write to Mista Cleo at thelowdownmagazine@yahoo.com and I'll fix all of your romantic problems.

Sagittarius

(Nov. 23- Dec. 21)

Sometimes life is just unfair. But you don't have to take it. Buy an oversized 80's boom box, cut the sleeves off all your T-shirts, and play Quiet Riot's "We're not going to take it," over and over again as loud as you can all month where ever you go.
