

Horrorscopes

By Mista Cleo

Capricorn

(Dec. 22- Jan. 19)

You will have things in life that require your attention this month. But let's face it, it's winter and you have riding to do.

Aquarius

(Jan. 20- Feb. 19)

You will drink too much on your birthday, spend way too much money and make a complete ass out of yourself. You could save yourself the money and drama by staying in, but you won't.

Pisces

(Feb. 20- March 20)

You're not happy with your low paying job and lack of respect you receive from those around you. This is Tahoe, either move away and get a real job, or remember why you moved here and have fun.

Aries

(March 21- April 19)

Your love life has you confused this month. You're sick of the eight-to-one guy to girl ratio at the bar. Write to thelowdownmagazine@yahoo.com for advice, your love life couldn't get any worse.

Taurus

(April 20- May 20)

You will remain broke and single this month. Rent Jerry McGwire; drink a bottle of wine and scream, "Show me the money," until you go horse.

Gemini

(May 21- June 20)

You're extremely in debt, but go ahead and buy that board or set of skis you've wanted. Life is short, and winter is even shorter. You'll regret it in the long run, but who really thinks that far ahead?

Cancer

(June 21- July 22)

You're going to win the lottery this

month so quit your job and start buying lots of things you don't really need. If you don't play the lotto, spend the entire amount of your next paycheck on lotto tickets, trust Mista Cleo.

Leo

(July 23- Aug. 22)

Is this Leo Anderson? The same Leo that's owed me \$20 for the past two months? You need to go on and find your own horoscope. Better yet, here's one for you. If Leo don't pay Mista Cleo his \$20, I see bad things in store for you this month.

Virgo

(Aug. 23- Sept. 22)

Your health will come into question in the next few months, but don't fret. The easiest way to improve your health is to start doing 12 oz. curls on a nightly basis. I recommend at least three sets a night.

Libra

(Sept. 23- Oct. 23)

Looks like it will be smooth sailing this month, which is good. Because next month, well, you don't even want to know about next month.

Scorpio

(Oct. 24- Nov. 22)

Your ski or snowboard career isn't working out as planned. To make extra cash, you'll move to Hollywood to star in a Viagra commercial.

Sagittarius

(Nov. 23- Dec. 21)

You will meet the man or women of your dreams this month. Shortly after meeting them, they will introduce you to their significant other who is much better looking, funnier and has a better job than you.
